Employment in China under COVID-19

Audit findings and rectifications

Areas to be strengthened in future audits

## I. Employment in China under COVID-19

- 1 Formulate and implement macro policies to address the urgent needs of market entities and stabilize the fundamentals of the economy
- 2 Give top priority to stabilizing employment and ensuring living standards and effectively safeguarded people's wellbeing
- 3 Work to ensure employment for key groups including college graduates
- 4 Improve the vocational skills of workers and increase the support for people facing difficulties

## II. Audit findings and rectifications

### Audit findings

- 1 ..... improper fund management and use
- 2 ..... effects of policy implementation yet to be improved
- 3 ..... delays in employment related education

## II. Audit findings and rectifications

### Rectifications:

Relevant localities have implemented the employment-first strategy and optimized the overall planning of funds, which provides a strong guarantee for new urban jobs, supports people facing difficulties and helps unemployed people find work.

Audited entities reviewed the problems identified through auditing, made corrections one by one according to auditors' requirements, which facilitated the proper use of funds in a well-coordinated way.

### III. Areas to be strengthened in future audits

- ➡ Pay attention to relevant supporting funds and implementation of employment related policies
- ➡ Strengthen the audit relating to flexible employment and new forms of employment
- ➡ Focus on the issue of "jobless recovery"
- ➡ Promote the synergy among employment policies and other livelihood policies, and improve people's well-being

Thank you for your attention.
